

# APOTHEOSYS SERVICES

## Consultancy

Expert advice and solutions to improve the efficiency and effectiveness of testing within your company.

We offer a comprehensive consultancy service centred around your business's testing environment.

Apotheosys Consultants can be provided on a short or long term basis to:

- Advise on all aspects of your business's testing environment and processes.
- Provide recommendations to improve efficiency, productivity and quality within your testing cycle.
- Use their expert technical skills to enable your business to succeed.
- Identify the benefits of automated testing and the way to achieve maximum results within your business.
- Undertake any testing or development related activities

## Test Automation

Helping your company exceed customer demands

Apotheosys Ltd has an extensive knowledge in the development and creation of automated testing infrastructures for both unit and regression testing and can provide a tailored plan and software to achieve this within your organisation.

At Apotheosys, we understand that the needs and objectives for each client are different. We would identify the key drivers for automated testing and illustrate how to obtain the maximum return on investment with regards to both costs and quality for your business.

**Key benefits:** Reduced support time, quicker time to market, residual value.

## Telecoms Test Scripting

Providing the expertise to ensure you meet your targets

Apotheosys Ltd has extensive knowledge in telecoms testing (2G, 2.5G, 3G, 3.5G) coupled with a vast experience of the development and execution of automated testing using complex test tools including Catapult MGTS and SIGOS SITE.

The following services are available:

- Test Script development and integration
- Technical expertise and assistance to help resolve test script problems
- Test Tools system administration including:
  - Installation and configuration
  - Evaluations
  - Upgrades/Patches
  - Utility/Tools design and development

**Key benefits:** Reduced development time, automated regression testing, re-usable assets

## Software Design & Development

Innovative solutions to meet your requirements

Apotheosys Ltd takes a unique view on product design and development. We can help you achieve your milestones during any phase of the software life cycle.

We can help you to capture exact user and system requirements as well as brainstorm the most effective, quantifiable and cost effective solution to meet your needs.

Our team of experts can also provide innovative solutions to meet any existing requirements.

Substantial investments have been made in our own internal infrastructure to enable us to provide you with a solid foundation to build robust, future-proof solutions at the highest possible quality.

**Key benefits:** Complete life cycle coverage, cost effective solutions, quantifiable cost analysis.
